

Privacy Policy

Robert Atherton built the Nod app as a Commercial app. This Service is provided by Robert Atherton and is intended for use as is.

This page is used to inform visitors regarding my policies with the collection, use, and disclosure of Personal Information if anyone decided to use my Service.

If you choose to use my Service, then you agree to the collection and use of information in relation to this policy. Nod does not collect any Personal Information. The Apple App Store provides anonymised metrics to allow the monitoring of the service. I do not share this information with the exception of providing anonymised, summarised sales figures.

Information Collection and Use

Nod is an app which has the entire purpose of recording your location and other locations that you mark and supplying this information for use by other systems and users. This information is stored at a location chosen by the user. The data can also be exported in other file formats for use with other software or use by other persons. Therefore the data is under the full control of the user at all times. The app records meta data along with location data in order to provide its 'tamper evident' feature. All the data that is collected is clearly visible in the app. The app stores all data in the single document that the user is currently working on. This document is in a text based, human readable form and can be viewed by the user using an software capable of displaying text data. The app has no means to transmit this data outside of the users control.

Log Data

The Apple App Store records and provides anonymised and sanitized metrics surrounding its use. There is also the opt in reporting of errors, which is a global setting on the device and not part of Nod. The app uses the Apple Map server to provide maps and imagery. Therefore the users location or geographical areas of interest are sent to Apple for the appropriate data and imagery to be returned. These data requests are anonymised and covered by the Apple Maps Terms and Conditions. These can be seen [here \(https://www.apple.com/privacy/\)](https://www.apple.com/privacy/)

Service Providers

I may employ third-party companies and individuals due to the following reasons:

- To facilitate our Service;
- To provide the Service on our behalf;
- To perform Service-related services; or
- To assist us in analyzing how our Service is used.

The information they have access is limited to that above.

Changes to This Privacy Policy

I may update our Privacy Policy from time to time. Thus, you are advised to review this page periodically for any changes. I will notify you of any changes by posting the new Privacy Policy on this page. These changes are effective immediately after they are posted on this page.
